

DD Series Double Disc Refiner

Application&Feature

1. Mainly used for pulping, improving slurry beating degree to meet the paper making needs.
2. It can be installed various tooth refiner plates. Suitable various raw materials such as wood pulp, mechanical pulp, chemical pulp, waste paper pulp etc.
3. Adopt constant power control system , beating effect is stable.
4. Accurate retract mechanism, easy to control, the beating effect is good.

Main Specification

Type	DD550	DD600	DD660
Diameter Of Plate(mm)	Φ550	Φ600	Φ660
Product Capacity(t/d)	10-100	12-150	15-200
Concentration (%)		3-5	
Motor Power(kw)	160-250	185-315	220-500
