

ZM Series Conical Refiner

Application&Feature

1. Primarily apply for continuously pulping wood pulp, mechanical pulp, cotton pulp, waste paper pulp etc. Improving the beating degree, which can be used with double disc refiner in series.
2. With features of long refining area, fully process finer, strong ability to cut fiber.
3. Shell's lined is stainless steel for improving service life.
4. Adopt constant power control system, the beating effect is stable.
5. Rotor and stator have various tooth. Suitable various raw materials.

Main Specification

Rotor Size(mm)	Φ450	Φ460
Operation Concentration (%)	3-5	3-5
Product Capacity(t/d)	20-60	30-150
Motor Power(kw)	110	132-315
